

Find the core words *in your lesson*.

Turn a lesson you're already teaching into a chance for him to think, not just label.

The idea: the specific noun names the topic; a few flexible core words let him reason about it. Fill this in for one real lesson, then pick one core word to model this week.

LESSON / TOPIC

SUBJECT

STUDENT

1 WHERE COULD HE THINK?

Mark the moments in this lesson where he could do more than answer yes/no — compare, describe, predict, question, or object.

2 WHICH CORE WORDS UNLOCK IT?

Circle the ones this lesson needs. These are on his device already.

more	less	same	different	stop	go	make	change	happen	what	why	how
not	think	like	big	little	good						

3 PLAN THREE MODELING MOMENTS

OPENING	A REAL QUESTION TO ASK (THEN WAIT 10 SEC)
DURING	WRAP-UP

4 MY WORD OF THE WEEK

One core word I'll model all week, in every subject:

One student I'll start with:

Remember: "Model to show, not to quiz." Touch the word as you say it, ask a real question, then wait a silent ten. Don't turn it into a test — just talk with your hands on the words. And you don't have to be a tech expert; you have to be willing to engage. That part is yours, and it's the part that matters.
